

# Give Your Customers a Better Experience and Save Money with SMS

## Why SMS?

Decrease hold times and give your customers a better experience by integrating SMS text messaging into your multi-channel UC solution. You can also save your client's money with shorter call times and fewer support calls by executing money saving tools like SMS outbound queuing and maintain strong customer relationships.

- ✔ Decrease hold times
- ✔ Save money with fewer support calls
- ✔ Improve & maintain the customer experience

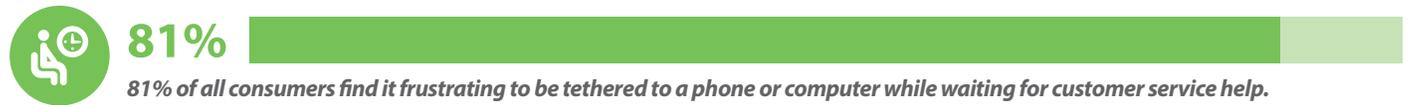

## SMS saves you money on every call

You could save almost **\$25,000 per month** or **\$300,000 annually\***

\*Based on 5000 calls per month if converted to automated proactive notifications.

## Don't leave them hanging... keep customers happy

Deploying money-saving tools like SMS outbound queuing allows you to maintain strong customer relationships. Notify customers via text message when a customer support rep is available and decrease average hold time.

Deliver a  
Superior  
Experience  
and gain a  
**competitive advantage**

## SMS... your customer's preferred option

**64%**

*64% of consumers would give a big thumbs up to a business that offered text messaging as a customer support method.*

SMS communications provide a stress-free customer experience options. Customers want lower wait times as well as the option to take care of easy, automated support options via text—simply and without frustration—tasks like checking on the status of an order, scheduling or modifying an appointment, making a reservation, changing a password and even asking basic questions. That means stronger customer relationships and more efficient communication strategies for your clients.
